# Letter of Recommendation

I would like to strongly recommend Rounak Jha for admission to the graduate program at your university. I have known Rounak for about 1 year now as an undergraduate student in Bachelors in Computer Engineering Engineering. Moreover, I was the supervisor for his final year project. I taught him Software Engineering.

I recall Rounak as a sincere and hardworking student. He maintained excellent academic performance throughout his undergraduate ranking among the Top 5% students of his batch. As an instructor and his supervisor too I had enough opportunity is observe his capabilities closely.

I was the supervisor in his project titled df. I was quite impressed by his hardworking nature and learning capability. I supervised him in his project sdf. I could observe his keen interest and aptitude for research while working on the project. In fact, he was also able to publish a paper on sdf.

I have noted his good presentation skills while he presented his work at our department as well as in the conference. He is a very hardworking student who is always eager to learn. He is very helpful and cooperative student. He eagerly handed over his project work to his juniors who wanted to further continue the research on the topic along with proper guidance and resources. I have also been impressed by his communication skills during project presentations and lectures.

I appreciate his technical and professional skills. Besides academics, he was also involved in several extra-curricular activities . He participated in various competitions organized in and off the campus. Unlike, most students who limit their project to an academic exercise, he actually deployed his project publicly in our server and maintained it.

I am quite confident that Rounak's skills coupled with academic capability will make him a good candidate for your university. Thus, I would highly recommend him for the graduate program at your esteemed university. Please feel free to contact me if further enquiry is required.

Aman Shakya,
Professor,
Department of Department of Electronics and Computer Engineering Engineering
