Letter of Recommendation

I would like to firmly recommend John Cena for admission to the graduate program at your university. I have known John for about 2 years now as an undergraduate student in Bachelors in Computer Engineering Engineering. I taught him Software Engineering.

I recall John as a sincere and hardworking student. In fact, he was the topper of his batch in Bachelors in Computer Engineering Engineering. As an instructor and his supervisor too I had enough opportunity is observe his capabilities closely.

I supervised him in his project zc. I could observe his keen interest and aptitude for research while working on the project. In fact, he was also able to publish a paper on c.

I have noted his good presentation skills while he presented his work at our department as well as in the conference. He also has given his time to different social causes. He is very helpful and cooperative student. He eagerly handed over his project work to his juniors who wanted to further continue the research on the topic along with proper guidance and resources. I have also been impressed by his communication skills during project presentations and lectures.

I appreciate his technical and professional skills. Besides academics, he was also involved in several extra-curricular activities . He participated in various competitions organized in and off the campus. Unlike, most students who limit their project to an academic exercise, he actually deployed his project publicly in our server and maintained it. He has worked in some IT companies which, I believe, has further added to his technical skills and professional experience.

I am quite confident that John's skills coupled with academic capability will make him a good candidate for your university. Thus, I would highly recommend him for the graduate program at your esteemed university. Please feel free to contact me if further enquiry is required.
